

Ocean X-Platform Firmware Upgrade Instruction Guide

Revision 1.2

Here are instructions for performing a firmware upgrade through OceanView on a spectrometer that has X-Platform electronics such as the Ocean FX and Ocean HDX.

- Go to the Ocean Optics website and download the two firmware files from the Software Downloads section. <u>https://oceanoptics.com/support/softwaredownloads/</u>
- 2. Connect your X-Platform spectrometer and open up OceanView (Version 1.6.7 or higher). Do not do this process wirelessly.
- 3. Go to the Schematic window and right click on the spectrometer icon and click Update Firmware.

4. In the File Selection box, click the ... button to locate an OBP file. Choose the larger file.

A		×
Directory:		
File:		
	Update Firmware	
		Close

5. Once a file has been selected, click the Upgrade Firmware button.

Directory:	X-Old_Blaze\Software-Firmware\OFX2-0_Release			
File:	FlameX_20170818_2113.obp			
	Update Firmware			

6. Once complete, OceanView will ask to power-cycle the device. Power cycle the spectrometer and also close and restart OceanView.

Messag		×
i	Firmware update succeeded. Please power-o	cycle the device.
	ОК	

7. Repeat steps 3 through 6 for the second file and then close OceanView, powercycle the spectrometer and re-start OceanView.
